

BIOPHYSICS COLLOQUIUM

February 11, 2004 4:30 p.m., 700 Clark Hall

JERRY FEIGENSON

Professor of Biochemistry,
Molecular and Cell Biology
Department of Molecular Biology
and Genetics

Cornell University

<http://www.mbg.cornell.edu/feigenson/feigenson.html>

Title: *A Possibility that Membrane Rafts Do Not Exist: Evidence from Studies of Model Bilayer Mixtures*

- To subscribe or unsubscribe to this mailing list, e-mail drbio@cornell.edu.
- Chair of the Spring 2004 Biophysics Colloquia is Jerry Feigenson, 255-4744, gwf3@cornell.edu.
- The website for Spring 2004 Biophysics Colloquia is:
<http://www.drbio.cornell.edu/Dissemination/seminars.html>

The Cornell Biophysics Colloquium is supported by a grant from NIH-NIGMS, "Training in Molecular Physics of Biological Systems," (Barbara Baird, PI); by NIH-NCRR supported Developmental Resource for Biophysical Imaging Opto-Electronics (DRBIO); and by contributions from Cornell departments and units: College of Agriculture & Life Sciences, School of Applied & Engineering Physics, College of Arts & Science, Department of Biomedical Science, Department of Chemistry & Chemical Biology, MacCHESS, Department of Molecular Biology & Genetics, Department of Molecular Medicine, Nanobiotechnology Center, Office of the Vice Provost for Life Sciences, and Office of the Vice Provost for Research.
